

Nova Warranty Expands Tesla Extended Warranty Coverage as Automaker Introduces Paid Repair Subscription

August 11, 2026

WILMINGTON, DE - August 11, 2026 -

Nova Warranty, a direct administrator of vehicle service programs, has drawn attention to the rising cost of out-of-warranty Tesla repairs following Tesla's recent launch of a paid repair subscription for owners whose factory coverage has expired. The automaker's new offering, which starts at \$60 per month, underscores a reality Nova Warranty says its customers already understand: repairs on Tesla vehicles can be costly once the original manufacturer coverage ends, and having appropriate protection in place matters.

Many early Model 3 and Model Y vehicles are now reaching the end of their factory coverage periods, leaving owners to weigh their options for continued protection. According to Nova Warranty, owners have received repair estimates ranging from \$7,000 to \$15,000 for a drive unit and \$1,500 to \$2,500 for a touchscreen replacement.

"When a manufacturer begins selling its own repair coverage, that signals the underlying risk is real," said a spokesperson from Nova Warranty. "Owners deserve more than one narrow plan, and they deserve to understand the choices available to them before a costly repair arrives."

Nova Warranty provides extended coverage for the Model S, Model X, Model Y, Model 3, and Cybertruck through two protection tiers. The Nova Powertrain plan covers critical components at a lower cost, while the Nova Superior plan offers a more comprehensive option. Both plans include battery and drive unit protection, charging port and charging system repairs, coverage for Autopilot-related software issues, access to ASE-certified repair facilities, and 24-hour roadside assistance.

Owners considering protection can compare Nova Warranty's coverage plans to determine which tier aligns with their vehicle and driving needs. The company notes that many owners of aging Tesla vehicles are unaware of their options until a major repair is required.

"A large share of the first Model 3 and Model Y vehicles on the road are aging out of their factory coverage," the spokesperson said. "It is better for owners to understand their options ahead of time than to learn about repair costs the hard way."

Feedback from existing customers regarding coverage and claims service can be reviewed through Nova Warranty's Trustpilot rating, where the company currently holds a score of 4.8 out of 5 based on customer reviews.

The timing of Tesla's subscription launch has placed renewed focus on how electric-vehicle owners plan for repair costs. Nova Warranty positions its plans as an alternative for those seeking coverage backed by certified repair facilities and roadside support. Tesla owners can request a free quote through Nova Warranty's Tesla Extended Warranty Program, which is designed specifically for the company's electric-vehicle customers.

Nova Warranty is a direct administrator of vehicle service programs, providing extended coverage for Tesla and other makes. The company specializes in protection for a range of vehicles, including luxury and daily-driver models, and supports its plans through ASE-certified repair facilities and 24-hour roadside assistance. Nova Warranty offers free quotes and structures its plans around transparent, upfront pricing.
